A+ Initial

ATF Contact advised of telecommunication requirements per Site Preparation Guide - RJ45 outlet jack with high speed service within 5 feet of the workstation. _____
A+ Initial

The Applus Technologies, Inc. (Applus) Representative advised me of the requirements as listed above in Section 4. Acting as an ATF representative, I acknowledge and understand our responsibilities as an ATF.

Test Center Initial

Authorized Testing Facility Site Evaluation Form

Section 6 - Comments

Section 7 - Installation Acceptance / Approval

By signing below as the ATF Contact, I am acting as the Authorized Testing Facility representative, and hereby acknowledge and accept this site evaluation and receipt of the "Site Preparation Guide".

The purpose of this document is to confirm the ATF testing bay/mobile site size and identify possible/potential installation concerns within "plain sight" of the Applus Representative.

It is agreed that building/mobile site modifications/improvements must be accomplished in accordance with all local applicable building codes; this includes obtaining any and all required permits.

Additionally, all fees related to site modifications including, but not limited to, permits; electrical and sub-panels; air line, regulator, water separator and filters; dedicated telecommunication installation and recurring charges are all assumed by the ATF.

ATF agrees to assume liability for all costs associated with unforeseen obstacles, obstructions and/or environmental issues, and if required by local regulations, a ventilation fan/system with a connection to outside the building.

ATF agrees to grant Applus or its representatives unrestricted access for the purpose of evaluating test bay/mobile site modifications and installing the workstation. Prior to workstation installation, ATF agrees to make the test bay/mobile site evaluated on this form a clean and clear area for equipment installation. Applus will not move or relocate existing equipment or obstructions.
